Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 7, 9-11 and 18-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Coninck et al (US Patent 6,328,842).

Coninck discloses a machine for welding hollow articles. As shown in Figs. 2 and 3A-I, plastic shells 21 and 22 are loaded into upper and lower molds or platens 24 and 27. Pistons 52 and 57 and vacuum suckers 51 and 56 hold and position the shells in the platens. Rams press the plastic shells against opposite sides of heating platen 54. The heating platen is then removed via holder 35 and the rams press the shells 21 and 22 to weld them together in the manner claimed by the applicant.

The applicant is reminded that the materials used are not germane to the patentability of an apparatus claim.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-6, 8 and 12-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coninck as described above in paragraph 2 in view of Wawrzyniak (US Patent 5,997,688).

Wawrzyniak discloses a blister-sealing device. The device includes shield 70 attached to the heating plate assembly 40 to cover the outer plate 68. This shield 70 may be a thin metallic layer that is heat-resistant (see col. 6, lines 5-13).

It would have been obvious to one having ordinary skill in the art to employ a heat shield, as taught by Wawrzyniak, in the device of Coninck in order to protect the operator and minimize heat loss. Further, it is the examiner's position that the adjusting system, smoke exhauster and lever assembly are within the purview of one having ordinary skill in the art and would have been obvious to employ in the device of Coninck in order to facilitate welding of the materials.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17, lines 2-3, "said protecting device" lacks antecedent basis in the claims.
